

1. Do I have an address?
`ipconfig /all`

2. Ping my own gateway

3. Ping something remote
by IP address

4. Ping the same thing
by name

5. It is not the network

fails → **DHCP** or **layer 2**
Chapters 20, 14

Start at the host, not at the core. No address, and nothing else in this list can possibly work.
