

1. Do I have an address?
`ipconfig /all`

2. Ping my own gateway

3. Ping something remote
by IP address

4. Ping the same thing
by name

5. It is not the network

fails → **DHCP or layer 2**
Chapters 20, 14

fails → **local segment**
VLAN, cable, ARP, wireless assoc.

fails → **routing, NAT or ACL**
Chapters 15, 22, 24

fails → **DNS only**
Chapter 21

Every rung that passes eliminates everything below it. Four commands, and the fault is in one of five places.
