

Aug 27 09:14:22.331:%LINEPROTO-5-UPDOWN:

The diagram shows the components of the syslog message 'Aug 27 09:14:22.331:%LINEPROTO-5-UPDOWN:'. Brackets are used to identify the following parts: a grey bracket under 'Aug 27 09:14:22.331:' is labeled 'timestamp'; a blue bracket under '%LINEPROTO-' is labeled 'facility'; a red vertical line points to the '5' between hyphens, with the word 'severity' written above it; and a purple bracket under '-UPDOWN:' is labeled 'mnemonic'.

Line protocol on Interface GigabitEthernet0/1, changed state to down

The single digit between the two hyphens. That is the severity — not a count, not an interface number. This is the field the exam asks about.
