

1. Do I have an address?
`ipconfig /all`

2. Ping my own gateway

3. Ping something remote
by IP address

4. Ping the same thing
by name

5. It is not the network

fails → **DHCP or layer 2**
Chapters 20, 14

fails → **local segment**
VLAN, cable, ARP, wireless assoc.

The gateway is the last hop still on our own segment. Passing here clears the cable, the VLAN and the association.
