

1. Do I have an address?  
`ipconfig /all`

2. Ping my own gateway

3. Ping something remote  
*by IP address*

4. Ping the same thing  
*by name*

5. It is not the network

fails → **DHCP or layer 2**  
Chapters 20, 14

fails → **local segment**  
VLAN, cable, ARP, wireless assoc.

fails → **routing, NAT or ACL**  
Chapters 15, 22, 24

By address, on purpose — it takes name resolution out of the question entirely.
