

Aug 27 09:14:22.331:%LINEPROTO-5-UPDOWN:

The diagram illustrates the components of the syslog message 'Aug 27 09:14:22.331:%LINEPROTO-5-UPDOWN:'. Brackets are used to identify the following parts:

- timestamp**: A bracket under 'Aug 27 09:14:22.331:'.
- facility**: A bracket under '%LINEPROTO'.
- severity**: A red vertical line points to the '5' between the hyphens, with the word 'severity' written above it.
- mnemonic**: A bracket under 'UPDOWN:'.

Line protocol on Interface GigabitEthernet0/1, changed state to down

The single digit between the two hyphens. That is the severity — not a count, not an interface number. This is the field the exam asks about.
